Understanding our Packaging Terms

Packaging that's Built for Growth

The Detpak Difference

Innovation

We understand how important differentiation is across every aspect of your business. That's why we have LaunchPad, our specialist, in-house packaging design agency and in-house R&D lab that drives innovation and growth exclusively for our customers; through bespoke design, materials science, cost engineering and sustainability. When you partner with Detpak, we help your brand stay differentiated in a busy market.

Sustainability

Sustainable packaging is undoubtedly the future, but we understand the pathway to that future is inconsistent, uncertain and anything but clear. That's where our sustainability experts come in, ensuring you have sustainable solutions fit for an evolving regulatory environment. It means sustainable choices today and the peace of mind you'll be ready for whatever tomorrow brings.

Supply Chain

The bigger your business gets, the bigger the disruption when something unexpected occurs. That's why we've deliberately built a global production network with owned manufacturing in seven countries, supply contingency across every product category and a dedicated global sourcing team. So, when you partner with Detpak, you can rest assured that packaging will never be your weakest link.

Subject Matter Expertise

When your brand grows, the problems that need solving tend to grow with it. That's why at Detpak we have subject matter experts to help provide innovative solutions for your business and guide you through packaging legislation. We'll take care of your packaging so you can focus on growing your brand.

Sustainable Choices

Responsible sourcing

Detpak facilities globally are FSC® and PEFC Chain of Custody certified, and we also offer FSC® and PEFC certified products. This means products have documented traceability through the entire supply chain, from forest to end product. Our key suppliers are also audited, to provide confidence that all tree fibre materials are from responsibly managed sources, which contain no illegal, controversial or old-growth fibre.

A world of lining options

As single-use plastics legislation continues to evolve, Detpak has eliminated linings on a range of products where not required for functionality. We have shifted entire categories to more renewable coating options, and now offer a range of options including Aqueous, PBS and PLA. Detpak continues to be a leader in new and emerging lining technologies and encourages a holistic approach to required linings and their end-of-life disposal.

Designing for end-of-life

Our dedicated product designers undertake assessments against Sustainable Packaging Guidelines to ensure the materials used are designed for recovery where practical. We also prioritise recycled content wherever possible, with a large number of products containing more than 80% recycled materials. We also maintain the most highly recognised global standard for food safety and quality including ISO:9001 and BRCGS.

Community comes first

Detpak takes pride in being a responsible manufacturer and employer, not just an importer. As a family-owned company, Detpak chooses to positively impact and take care of our communities around the world, from our headquarters in Adelaide to supporting initiatives in the countries where we operate, and beyond. We welcome the regular social accountability audits we are a part of for our global customers.

Detpak and the Detmold Group donate crucial funds to the South Australian Health and Medical Research Institute (SAHMRI).

Australia, we've got you covered

Australia is taking action against single-use problematic plastics (SUPPs)

The complexity of packaging legislation is expected to continue as APCO implements its 2030 strategy, the Commonwealth Government progresses reform and States & Territories act on problematic plastics.

We're staying ahead of legislative changes, so you can feel confident we've got you covered.

Our extensive range of recyclable and compostable packaging solutions offer sustainable alternatives suitable for your location.

Visit detpak.com or contact our team to stay up to date with legislative changes and discover compliant product solutions for your region.

**WE MAKE RESPONSIBLE CHOICES,
TO MAKE YOUR CHOICE EASY**

No Added PFAS

We have now transitioned all affected products to new materials, including no added PFAS grease-resistant papers and the Vanguard® by Eco-Products range of moulded fibre products.

Our commitment to sustainability is evident in pioneering packaging solutions for a better tomorrow. Our no added PFAS sugarcane food packaging range, the first of its kind in Australia, is a testament to this commitment.

The full Detpak range is now free of added PFAS, giving you peace of mind when selecting your foodservice packaging range.

What is PFAS?

PFAS (per- and poly-fluoroalkyl substances) are a group of chemicals used in a range of applications in common household items, to provide them with water, heat, sticking or grease resistance properties. PFAS are considered forever chemicals as they remain present in organisms and the environment indefinitely.

The Australasian Packaging Covenant Organisation's (APCO) voluntary action plan aims to phase out PFAS in fibre-based food contact packaging in Australia.

Elevate Your Brand

At Detpak, our packaging experts are dedicated to turning packaging from a basic need into a strategic advantage for your business. Through LaunchPad and LaunchPad Lab, we deliver innovative packaging solutions tailored to your needs. Partnering with Detpak means you receive quality, customised packaging solutions designed to fuel your growth.

Choose your item from our wide range and follow the simple steps below to customise. Minimum order quantities vary by product, and size however, as a guide:

Hot Cups	From 50,000 per size
Bags	From 5,000 per size
Wraps	From 25,000 per size
Cartons/Trays	From 10,000 per size
Bowls	From 50,000 per size
Napkins	From 25,000 per size

Step 1

CHOOSE YOUR PACKAGING.

Take your pick from our off-the-shelf options or chat to a Detpak Representative about a bespoke solution.

Step 2

DESIGN YOUR PACKAGING.

Tell us what you have in mind for your packaging design and we'll take it from there. Or, if you are working with a designer, we'll send you everything you need to complete the artwork.

Step 3

APPROVAL.

Once you're happy with the final artwork, give us the green light to go ahead with the printing.

Step 4

DELIVERY.

We'll deliver your stunning new packaging to you as soon as it's ready.

A variety of
checkout, food
service and
food delivery
bags.

Takeaway & Checkout Bags

Takeaway and Checkout Bags are constructed from strong materials for holding multiple items. They are free-standing and easy to load.

Bread, Bottle & Specialty Bags

Bread Bags are made from quality paper, perfect for showcasing and protecting delicious baked goods. Bottle Bags are ideally sized for takeaway drink sales. Quality Specialty Bags are ideal for an array of produce and other needs.

Recyclable Wholesale Coffee Bags

Our Recyclable Wholesale Coffee Bags provide a recyclable alternative to soft plastic and plastic lined coffee bags, and are ideal for transporting and short term storage of freshly roasted coffee beans. These bags are heat-sealable to ensure coffee beans stay fresh.

Grease Resistant & Greaseproof Lined Bags

Grease Resistant (GR) Bags are made with grease resistant paper for lightly greasy foods. Greaseproof Lined (GPL) Bags are 2-ply, featuring an inner layer of greaseproof paper, making them ideal for fried, greasy foods. Selected sizes are strung for easy hanging in-store.

Quick Service Bags

Foil Lined Bags protect against grease and oil, whilst also retaining heat. They are ideal for foods like barbecue chicken and naan breads. They are safe in a conventional oven up to 150°C. The 'Hot Chicken Tasty' Chicken Bag features a poly-lining, protecting against grease and oil.

Food Trays & Clams

Food Trays are sturdy and grease resistant and can be used for a variety of different foods. Clams are made from claycoat board.

PBS Food Trays

Our PBS Food Trays are an innovative range made using Polybutylene Succinate. This material creates a compostable solution, without compromising on quality or performance.

Poly-Lined Food Trays

Food Trays are sturdy and can be used for a variety of different foods. These trays are poly-lined to provide extra grease resistance.

Eco-Products® Sugarcane Clams

Vanguard from Eco-Products® Sugarcane Clams are sturdy and ideal for use with hot, cold and greasy foods. The sugarcane retains temperature but is breathable, keeping foods hot and crispy. These clams are fridge, freezer and microwave safe, and ovenable for up to 220°C for 20 minutes. We recommend oven testing to ensure suitability for your own operating conditions.

PE Lunch Boxes

Lunch Boxes are poly-lined, making them ideal for saucy foods and salads with dressing. They feature a hinged lid for quick filling and easy access for eating.

PBS Lunch Boxes

Our PBS Lunch Boxes are an innovative range made using Polybutylene Succinate. This material creates a compostable solution, without compromising on quality or performance. The window is made from Polylactic Acid (PLA) which provides crystal clear viewing.

Window Patisserie & Cupcake Box Range

The Patisserie and Cupcake Box Ranges feature large viewing windows to show off cupcakes, cakes, pastries and other baked goods. A light claycoat provides protection against grease.

PE Food Pails

PE Food Pails are perfect for a variety of hot and cold foods. They're poly-lined, so they can handle saucy foods like noodles, pasta, and salads with dressing. Pails are free standing for quick and easy filling. Our wire handle option means you can carry the pail without a bag.

Vanguard by Eco-Products® Sugarcane Trays are strong takeaway bases, safe for use with both hot and cold foods. The sugarcane is grease and cut resistant, keeps food crisp and retains food temperature.

Eco-Products® Tray Lids

Our Eco-Products® Tray Lids are available in Vanguard Sugarcane, RPET (recycled PET) or PLA (polylactic acid) options, for maximum strength and optimum presentation. PLA lids are perfect for cold foods, while the 100% recycled content lids work equally well for hot or cold dishes.

PLA Paper Bowls & Lids

PLA Paper Bowls are great for salads, fruit salads, yoghurt and soup. They are made from paperboard with a PLA lining. Pair with the PLA Paperboard Lid, for a complete compostable solution.

PE Ice Cream Bowls

PE Ice Cream Bowls are poly-lined on inside and out, to prevent the board softening. They're perfect for very cold foods such as ice cream, yoghurt and frozen desserts. Pair with our range of Dome and Flat Ice Cream Bowl Lids.

Understanding our Packaging Terms

What is 'Recyclable'?

A product or material is recyclable if it can be collected and re-manufactured into a new product. If a Detpak product is listed as recyclable, it means this product can be readily recycled via kerbside recycling streams once food residue has been removed.

What is 'Compostable'?

Our compostable packaging is made from organic materials that break down naturally in optimal conditions, leaving no toxic residue. Microorganisms, humidity, and heat is required to break packaging down effectively and when combined with green waste and food scraps, can create a nutrient dense compost to improve our soils.

Detpak's range of unlined paper and board products are readily compostable, and for all other items marked as 'compostable', various global certification standards exist, enabling consumers to understand how to responsibly dispose of their packaging. Certain packaging requires commercial composting facilities with the right amount of heat and moisture to break down, and other items may be compostable in a home compost environment. We recommend you check with your local council regarding acceptance of food soiled compostable packaging through green waste collection.

What is 'No Added PFAS'?

A product that has not had PFAS added. PFAS (per- and poly-fluoroalkyl substances) are a group of forever chemicals used to provide common products with water, heat, sticking, or grease resistance properties. The Detpak stock range is free of added PFAS.

Commercial Compostability

AS 4736 - Australian Standard Certification
EN 13432 - European Certification

Home Compostability

AS 5810 - Australian Standard Certification

How we measure our products

Measurements throughout our Product Catalogue are displayed in millimetres.

Bags & Wraps

L x W x G
Length x width x gusset (where applicable)

Bowls

L x W x H
Diameter x diameter x height

Cartons & Trays

L x W x H
Length x width x height

Our Materials

Paper and wood

Our paper and board is sourced only from responsible forestry, meaning no old growth forests are used. We use quality papers and board when making all our products for premium quality assurance.

Aqueous

Aqueous lining is an innovative water-based dispersion coating which significantly reduces synthetic polymer usage compared to bioplastic and plastic-lined options. Detpak's Aqueous Cups are certified Home Compostable to the Australian Standard AS 5810 and are free from harmful chemicals and intentionally added PFAS.

PBS (Polybutylene Succinate)

Polybutylene Succinate is a polymer which is made from two different components. One component is fossil fuel based, and the other component can be derived from renewable plant sources. This material creates a compostable and recyclable solution for cartons, without compromising on quality or performance.

PLA (Polylactic Acid)

Polylactic Acid is a bioplastic derived from cornstarch. It is a rapidly renewable resource and can be certified as industrially compostable. Our PLA options include CPLA (crystallised polylactic acid) or PLA-lined packaging.

Cellulose

Cellulose film is derived from plant cells and performs well in high-temperature environments. Cellulose film is compostable and provides crystal-clear viewing.

Sugarcane (Bagasse)

Sugarcane bagasse, a byproduct from sugarcane production, is an example of fibre-based packaging and is a rapidly renewable resource. Our sugarcane can be certified as either home or industrially compostable.

Plastic

Our traditional plastic options include cups, lids and bowls and are made from PET, polystyrene or polypropylene. These items are marked on the product with a Plastics Identification Code (PICs) between 1 and 7, which denotes the type of plastic used to make the product.
