

EXACTA

NAPKINS

DECREASE NAPKIN USAGE BY 30% BY TAKING EXACTA-LY ONE EACH TIME!

Choose brown if you are more environmentally conscious or white for a more traditional look.

Interleaved Exacta Napkins are designed to be used with a dispenser. This, combined with the strong and thick feel of the napkin, means customers feel satisfied grabbing just one, which means you can decrease usage and save money!

Reducing wastage means these napkins are better for the environment, and they also contain 100% recycled fibres in brown or 50% recycled fibres in white. They are naturally biodegradable and compostable.

Exacta Napkins are also a great time-saver!

The range of dispensers hold between 200-550 napkins at one time, and this high capacity reduces the frequency of refills, which means you save on time and labour - plus there's less risk of run-out.

The great thing about the dispenser napkin combination is that both staff and customers touch only the napkin they use, reducing the spread of germs, improving hygiene, and giving customers peace of mind.
