**INDUSTRY LEADING PACKAGING MANUFACTURER DETPAK  
ANNOUNCES STRATEGIC PARTNERSHIP WITH ECO-PRODUCTS®**

*May 11, 2021*

World-class paper and board packaging manufacturer Detpak has partnered with US-based Eco-Products to provide industry-leading sustainable packaging solutions across Australia and New Zealand.

The partnership brings together a wealth of experience, with Eco-Products bringing a more than 30-year history in compostable foodservice products to complement a leading range of sustainable packaging solutions from Detpak.

Chief Executive Officer of parent company Detmold Group, Alf Ianniello, said the partnership was an important development in Detpak's ongoing commitment to customers.

"It is my pleasure to announce that Detpak will partner with Eco-Products," Alf said.

"Detpak has long been an innovator of paper and board products and is an industry leader in the development of recyclable product solutions.

"This partnership extends our range to further assist customers in diverting waste from landfill.

"Our approach has always kept our customers front of mind, and this partnership provides the best in innovation in the compostable packaging space, alongside extensive product knowledge and history, and a robust and reliable supply chain.

"We look forward to providing a comprehensive range of products, which are all responsible by design."

The partnership will see new items added to the Detpak range, supplied by award-winning and certified B Corp business Eco-Products whose assortment of products include compostable cups, take-out containers, tableware, and other foodservice packaging options.

"As a leader in environmentally preferable foodservice packaging, we offer ethically sourced products made from renewable materials that meet stringent global standards for compostability or recyclability. That means each item can be returned to the earth or made into something new," Eco-Products President Ian Jacobson said.

"We believe sustainability is a journey and are committed to a world where we work together to put waste to work."

The new products are now available alongside Detpak's existing extensive range. You can learn more about Eco-Products from Detpak: [www.detpak.com/ecoproducts/](http://www.detpak.com/ecoproducts/)
